

## USER GUIDE: E704 Portable Energetic Vitaliser

The E704 Portable Energetic Vitaliser will create a circular protective field and healthier environment of an area 5 metres (16.4 feet) in diameter, when it is in vertical orientation. Efficiency can drop to 60% if the unit is in a horizontal orientation, which is a marked improvement over previous generations of Portable Energetic Vitalisers.

These coverage figures are applicable whether it is carried on a person, being transported in a vehicle or if stationary.

Benefits of the unit's energetic field include the reduction of harmful earth energies (Geopathic Stress) and reducing the effects of Electro Stress (also known as Electromagnetic Pollution) such as that near computer equipment, mobile phones (cell phones), mobile phone masts (cell phone towers), electric pylons and electric sub-stations. Users will also experience a reduction in anxiety and tiredness. The unit acts as a great energy booster for you, just like the other products in the Geomack range, which is due to the unique Geomack Energetic Vitalising Technology, which is utilised in every model.

With the coverage of the E704 it can cover a double bed in all but the worst cases of harmful earth energies or Electro Stress. It can be placed at the side of the bed, or preferably underneath the bed in the centre. It must be said that it is, of course, preferable to cover the whole of one's home or workplace, which would require a larger model of Geomack Energetic Vitaliser. Either the E4004 or the E9004, depending on the size of your home or workplace.

For more energy put your E704 beside your computer, between your legs when seated or near you when in your car. If you have an ache try holding the E704 on the affected area.

Some customers like to stand their E704 vertically between their thighs when they are sitting on a chair. You can also put your hands on top of the unit at this time. After 15 or 30 minutes you can put it back to where it was before. Try it. See how you feel.

### **Resting Procedure:**

In rare cases, if Geomack products are working very hard against a lot of Geopathic Stress and/or Electro Stress, then sometimes it is beneficial to rest them. The 'Simple Rest' is just to lie it down horizontally for 6 to 8 hours. Then afterwards just stand it back up.

If you feel that the 'Simple Rest' did not return your Geomack to full working power, then try to do the more efficient 'Salt Rest'. Make one big 'bed' of salt longer than the E704 unit, on a table or floor. A layer of salt about 1 cm ( half an inch ) or more, is recommended. You can use Rock Salt or Himalayan Salt, but regular Sea Salt is fine. Lay the E704 unit down on the salt covered area for a minimum of 5 hours. You can do it for over 8 hours, for more benefit.
